BUNCHHEANG CHHUNG

COUNTRY MANAGER SINCE 2017

I live in Siem Reap province, Prasat Bakong District. I am 41 years old and have one daughter who is 15 years old.

My school life was very hard as the situation at that time in my country was not stable due to the civil war. My family was poor, so the whole family did not have much focus on education while I was the only one who loves education. I graduated in 2016 from National University of Management majoring in management and now I work for SBI Ly Hour Bank which is located in Phnom Penh city.

If you had to write a book, what will the title be? Why?

“Power of Engagement” because the solidarity is the main key to achieve our goals. The achievement of every task should not be done if engagement is lacking. One student can complete school due to the social engagement from many, so the engagement is very necessary for our society and community.

How did you get to know PS and how did you become involved?

I know PeopleStories through my action of sharing some projects of volunteering with the genius person who is the one who founded and is building the PeopleStories team. I can proudly say that she is the second mother and teacher of many students in my country.

I am involved with PeopleStories because of its vision and mission of focussing on education which is the priority for my country. I would like to see all Cambodian children successfully complete school, so I wish my involvement with PeopleStories can be some part of those students' achievement. I hope my involvement with PeopleStories can be some part to change those students' future.

Why PeopleStories?

PeopleStories can make a positive change in education in my country, especially in my community. PeopleStories is working hard with a smile and inspiring Cambodian children and students to be confident with their daily life. I like the way PeopleStories is helping people to receive the real and right things, we understand the needs of receivers. PeopleStories is the good partnership of our government to develop and improve our education sector. Its sponsorship is a positive impact with the changing of education in my community.

If you are granted 3 wishes to make the world a better place, what would those wishes be?

- 1) Our world is full of peace and most people in this world must well understand the law of nature which is the best lesson of our Buddha.
- 2) Children in the world to obtain the equal chance of living and educating. I would guess that more than 50% of children in the world are facing difficulty.
- 3) All the people in the world to have the holy heart which is making our world is full of sharing and caring..
